It works with both CMD exe (traditional batch) or PowerShell Run the executable and you will be asked to browse for a batch file.. Can I create a batch file to run an exe file? Of course, that is a big part of what batch files are designed to do.. An INI file containing the path to the script will then be created next to the executable.. Every time you run Silent Batch Launcher from then on it will execute the same batch file as long as the INI file is present.

make exe from batch file

make exe from batch file, make directory with date from batch file, how to make a batch file run automatically from a usb, make windows service from batch file, make text file from batch, make run from batch file, make batch file run as admin, make batch file run in background, make batch file run on startup, make batch file wait, make batch file stay open, make batch file run hidden, make batch file not close automatically, make batch file wait until command completes

how to make a batch file run automatically from a usb

make text file from batch
